RE: Contract Amendment– StreetSaver[®] Software Development, Maintenance & Support Services:
DevMecca.com

MTC's pavement management program, StreetSaver[®], is designed to provide local jurisdictions with a set of recommendations, or "best practices", for pavement preservation, in order to help them use their limited local street and road funding in the most cost-effective manner. Currently, all 109 Bay Area jurisdictions use StreetSaver, in addition to over 300 users nationwide. MTC uses StreetSaver exclusively to report the pavement conditions annually in the State of the System Report for local streets and roads and to project the region's pavement needs that feed into the regional transportation plan.

In 2009, following a competitive procurement process, MTC retained DevMecca.com to provide ongoing software maintenance and support, future software updates, and enhancements. The Committee approved a two-year contract, with the option to extend the contract for two additional two-year periods.

The proposed contract amendment, in an amount not to exceed \$605,000 for FY 2011-12, will be used to provide ongoing software maintenance and support, software updates and enhancements including non-pavement asset management and multiple performance curves, hosting StreetSaver application online, as well as, database migration and conversion from previous versions of StreetSaver and other pavement management software. With this amendment, the contract with the consultant will have covered three years for a total \$1,685,000. Funding for this contract amendment is included in the approved FY 2011-12 agency budget.

Recommendation

Staff recommends that this Committee authorize the Executive Director or his designated representative to negotiate and enter into a contract amendment with DevMecca.com in an amount not to exceed \$605,000 to provide StreetSaver software development services through FY 2011-12.
